

➡ BXXSXX-1WH2 Series

Fixed input voltage
Unregulated single output
DC/DC Converter

• Product Feature

- ⊙ Constant voltage input(5-24VDC±5%)
- ⊙ Efficiency up to 80%
- ⊙ Wide operating temperature range : -40°C~+ 85°C
- ⊙ Isolation voltage 1500VDC 0.5mA 1Minute
- ⊙ Single-row in-line (SIP) encapsulation
- ⊙ Plastic shell flame retardant package
- ⊙ Comply with the RoHS directive
- ⊙ Heat dissipation mode: natural cooling
- ⊙ Mean time without failure: 500000H

• Application Area

Communication interface converter (RS232/485) cellular phone, semiconductor laser, operational amplifier power supply, portable instrument, automatic control device, etc.

• Recommendation test

Filtering: In some circuits sensitive to noise and ripple, a filter capacitor can be externally connected to the input and output terminals of DC/DC to reduce ripple's impact on the system, but the value of the filter capacitance should be appropriate. If the capacitor is too large, it may cause startup problems. For each output line, under the condition of ensuring safe and reliable operation, The maximum capacity of its filtering capacitance can be referred to the external capacitance table. In order to obtain very low ripple, an "LC" filtering network can be connected to the input and output end of DC/DC converter, so that the filtering effect will be better. At the same time, it should be noted that the value of inductance and the frequency of "LC" filtering network should be staggered from the frequency of DC/DC module power supply to avoid mutual interference. For each output line, it is recommended to see the capacitive load value (Table 1) under safe and reliable working conditions.

Table of recommended capacitive load values (Table 1)

| Input Voltage (Vin+) | Input Capacitor(Cin) | Output Voltage(Vout) | Output Capacitor Cout) |
|----------------------|----------------------|----------------------|------------------------|
| 5V | 1uF | 3.3V | 4.7uF |
| 12V | 4.7uF | 9V | 2.2uF |
| 24V | 1uF | 15V | 0.47uF |

⇒ Explanatory matters

• Packing

This series module is packed with 2 electrostatic packing tubes.

• Transport

The modular package is allowed to be transported by any means of transport, which shall avoid direct rain or snow and mechanical damage.

• Store

Modules should be stored in a warehouse where the ambient temperature is -40 degrees ~ 125 degrees, the relative humidity is 10%~90%, and the surrounding environment is free from acid, alkaline and other harmful gases.

The above are the performance indicators of the product series listed in this manual. Some indicators of non-standard products may exceed the above requirements. In case of any inconsistency between the manual and the product specification documents, please refer to the specification documents.
